**FR Paint**
Flame Retardant finish to protect, seal and decorate over ISS intumescent Steel Coating or 2 coats of ITC intumescent paint for 30 or 60 mins.
- Durable, high opacity, weather-resistant.
- Maintains Class O on primed non-combusible surfaces.

**FR Paints** assist in the control of fire hazards caused by combustible materials such as wood and paint in buildings by releasing a flame extinguishing gas upon contact with a fire.

**Available in**
2.5 and 5 litre packs

**Finish and colour range**
- Gloss: BS 4800, plus RAL.
- Eggshell: BS 4800, plus RAL.
- Metallic: Steel, gunmetal.

**To specify**
(Note) - To upgrade surfaces, see ISS intumescent Steel Coating and ITC intumescent paint.
To maintain existing fire rating apply:
Over similar colour - 1 coat FR Paint @ 8 sq m per lit.
Over contrasting colour - 2 coats FR Paint @ 10 sq m per lit
External - 2 coats @ 10 sq m per lit.

**Application**
- Brush, roll or conventional spray
- Ensure surfaces are dry
- Do not apply when rain, damp or condensation may occur
- During application or drying

**Composition**
- Flame retardant agents
- Alkyd binders
- High opacity pigments

**Fire testing**
- Tested to BS476 Part 7; Class 1 surface spread to flame.
- BS476 Part 6; Fire propagation.
- Designated Class 0 in accordance with U.K. Building Regulations.

**Coverage**
- High opacity colours - 1 coat @ 8 sq m per lit.
- Poor opacity colours, major colour change, metallic finish or external apply 2 coats @ 10 sq m per lit.

**Minimum drying times:**
- Touch Dry 6 hours
- Recoat 12 hours
- Stacking & Transport 5 days

**Quality assurance**
Both products are manufactured under ISO 9001.
